

Table 2: Annual warthog counts along transects in the four vegetation types of Ndumo Game Reserve. Habitat length is the length of the respective habitats in different transects. Mean density indicates number of warthogs/km. There is a significant preference for thicket and water (1-way ANOVA $p < 0.002$)

		Habitat				n
Year		Bushveld	Sand	Thicket	Water	
2013	Length (km)	8.34	9.7	17.5	15.36	
	No. warthog	44	33	95	64	236
	Mean density	5.276	3.402	5.429	4.167	
2015	No. warthog	15	5	46	184	250
	Mean density	1.799	0.515	2.629	11.979	
2016	No. warthog	36	25	20	154	235
	Mean density	4.317	2.577	1.143	10.026	
2017	No. warthog	12	28	25	104	169
	Mean density	1.439	2.887	1.429	6.771	
2018	No. warthog	13	1	67	60	141
	Mean density	1.559	0.103	3.829	3.906	
Overall	No. warthog	120	92	253	566	1031
	Mean density/year	2.88	1.9	2.89	7.37	
	SEM	0.7999	0.6646	0.7932	1.5956
