

Table 1. Basic study data of sustained pharyngeal inflation (SPI) of different durations and intra-pharyngeal peak inflation pressure (PIP) measured with flexible bronchoscopy in infants

Variables	Data, mean (SD)
No. of Cases / measurement	20 / 40
Body weight, Kg	11.6 (9.1)
Age, months	6.8 (2.4)
SPI study	
Operative time, minutes	5.7 (1.2)
